

90cm Victoria range cookers

TR93

TRI90

Introducing Traditional Elegance in 90cm

Following on from the huge success of the **110cm wide 'Victoria' TR4110 Traditional Range Cooker**, and in response to **overwhelming consumer demand**, Smeg has introduced two new smaller sister cookers – the 90cm wide **TR93 with 3 ovens**, and the 90cm wide **TRI90 with one 126 litre maxi oven cavity**.

The TR93 cooker features 3 oven cavities, including a separate grill oven. Each cavity is finished in Smeg's special **EverClean enamel** which brightens the oven interior and makes **cleaning simple** as it reduces the amount of cooking grease that sticks to the oven walls. The main oven (positioned lower left hand side) has an ample **63 litre net capacity** with side opening door for easy access. It has **4 shelf positions**, and **9 cook functions** including Circulaire fan cooking, conventional top and bottom heat, Turbo, as well as a handy defrost function. The main oven is also equipped with a chrome shelf, telescopic guides, and roof liner and incorporates the Smeg **Vapor Clean** facility which gently **steam cleans** the cavity to ensure that the need for using harsh cleaning agents is kept to a minimum. Furthermore, the base of the main oven is specially formed to accommodate **Smeg's pizza stone accessory** which is ideal for cooking the perfect stone-baked pizza in approximately 4-5 minutes from raw. The main oven door is **triple glazed** with a large, clear window for viewing the progress of your cooking with ease.

The auxiliary oven (positioned on the right hand side) has a **full height enameled side opening door** which is internally glazed for energy efficiency. With a **net capacity of 66 litres** this tall oven is equipped a total of **9 cooking levels** and 4 x chrome shelves, making it ideal for small batch baking or plate warming. Both the main oven and the auxiliary oven are **'A' rated for energy efficiency**.

The **grill oven** (positioned on the top left) boasts a **powerful 2.7kW adjustable grill**, and has a **36 litres net capacity** and 2 cooking levels. Operating with the drop down door closed to ensure safety, the grill is particularly **energy efficient** and in addition to the easy to maintain enamel interior it also offers a **roof liner** for effortless cleaning, and **telescopic guides** for easy access.

The hobtop has heavy duty **cast iron pan supports** and **6 gas burners** ranging from 1kW to 2.9kW, and including a **4.2kW Ultra Rapid burner** for even more powerful **wok cooking**.

Alternatively the 90cm wide **TRI90** cooker has one single large multifunction oven. **'B' rated for energy efficiency**, it features **8 cooking functions** and the inside of the cavity is finished in **EverClean enamel**. Below the oven there is a large and **practical, full width, drawer** useful for storing kitchen utensils and baking accessories. The TRI90 hobtop also boasts heavy duty cast iron pan supports and includes 5 gas burners, one of which is an **Ultra Rapid burner with 5kW of power**.

Both new models incorporate the **warm and familiar feel of the Victoria design** line, characterised by soft curves, and are available in either a stylish **gloss black** or **gloss cream** enamel finish. They each have an extremely **robust build quality** and sport the **iconic Smeg signature** on the upstand which ensures that they blend perfectly with other Smeg products such as **50's Retro Style** refrigeration, dishwashers and laundry appliances. Like their big sister, the TR4110, the new 90cm Victoria cookers also reflect **timeless elegance** and **instantly recognizable Smeg style**.
